Settings

~~You Edit~~ You can change the behavior of the site in various ways.
Choose a category of settings below to edit the settings it contains

All

Interface

e.g. Max per subitems per page

Search Results

e.g. ~~Default~~ Quick search box: search ~~terms~~ ^{subitems} of current item (inc/excl ^{all} descendants) / search everywhere etc.

Feedback

~~Data~~ Browser / Data settings

e.g. send Data as: XML/HTML
compress: Yes/No

Feedback

Go to Feedback
section and >> this
setting, so users can
look at and add to
the comments about this
setting.

Main Default Item Page

contains item full content

~~Subitems~~ From ~~50~~ subitems underneath

Breadcrumbs \Rightarrow This Item

click Page Number (or next Page etc), change ordering
even if going to pg 1

Main Item summary

~~50~~ items of this page underneath

Breadcrumbs \Rightarrow This Item : Page 2

Versions

~~Item Summary~~ Current Item full text

Prev ~~Items~~ ^{versions} full text

Search within my sections

Item Summary

Search results underneath, in pages if necessary

Breadcrumbs \Rightarrow This Item : Search Results (actual search remains in quick search bar)

Create Subitem

Main Item Summary

Form for creating item

after submit, go to ^(parent) the page and position in page that shows ~~this item~~ the item just created

Parents

Item Summary

Parents

Investments

Item Summary

single item called "Investments"

contains a long column made of donor called divs

every block is an investment. Beside it the name of investor and amount invested.
